DESCRIPTION

BLUTEC ULTRA 100 is a alkaline, liquid detergent, containing a combination of organic agents suitable for cleaning filtration plants as well as reverse osmosis plants with alkali-resistant membranes.

APPLICATIONS

BLUTEC ULTRA 100 is designed for metal oxides removal, cleaning and preventing from organic material growth.

BLUTEC ULTRA 100 is not intended to be used with aluminium components and cellulose acetate membranes, as they may be damaged. Follow the recommendations of the membrane manufacturers for maximum temperature, pH, and time limits.

Avoid food contamination during application and storage. Do not store in food processing areas. Rinse surfaces thoroughly with fresh water after use.

DOSAGE

Following a suitable pre-rinse with water, concentrations of 1.5 to 3.0% up to a temperature of 50-60°C are recommended.

Exceptionally, higher concentrations and temperatures are permitted. After cleaning, all treated surfaces should be rinsed residue-free with water.

ADVANTAGES

- Good removal of proteins and other organic residues.
- Low phosphate content
- Compatible with most kinds of commonly used membranes.

CAUTION

Avoid food contamination during application and storage. Do not store in food processing areas. Avoid inhalation and contact with skin and eyes. Use gloves and protective goggles. In case of contact with eyes/skin always refer to product MSDS and seek medical advice.

PACKAGING

Not returnable
- Plastic pails 20/25 ltrs
